FIO®SYSTEMS AG

FIO SYSTEMS AG is a German leader in providing web-based real estate and banking solutions. Established in 1999, our company stands for high-efficient software solutions and consulting services. Our products cover all processes in the areas of real estate management and marketing, virtual banking and claim management.

Due to the expansion of our programming team we are seeking to employ a talented, qualified professional for the following position:

ASP.NET Front-End Developer

Scope of responsibilities:
- Participate in the development and the implementation of our new corporate design
- Take part in designing new product features
- Design and implement mobile versions of our products
- Troubleshoot and fix problems in the front-end of our products
- Actively work on improving our products in terms of modern design and usability

We require:
- Knowledge of HTML/XHTML
- Knowledge of JavaScript and JavaScript libraries (jQuery)
- Knowledge of CSS and creating cross-browser layouts
- General understanding of good front-end development practices
- Familiarity with ASP.NET would be an advantage
- Experience with Adobe Photoshop or Fireworks would be an advantage
- Professional experience in front-end development would be an advantage
- Ability to work in a team
- Good troubleshooting and problem solving skills
- Good written and spoken English
- German would be an advantage

We offer:
- Interesting work with the latest technologies
- Excellent working environment in a young and dynamic team
- Opportunity for personal and professional development
- Attractive remuneration based on your particular skills and your dedication to work
- Possibility for flexible work schedule for students
- Excellent work-life balance

Please send your CV in English or German and a recent photo to: jobs.bulgaria@fio.de
