

Analysts in Software Delivery Team

We are the leading global information services company, providing data and analytical tools to our clients around the world. We help businesses to manage credit risk, prevent fraud, target marketing offers and automate decision making.

We also help people to check their credit report and credit score, and protect against identity theft. In 2015, we were named by *Forbes* magazine as one of the 'World's Most Innovative Companies'.

We employ approximately 17,000 people in 38 countries and our corporate headquarters are in Dublin, Ireland, with operational headquarters in Nottingham, UK; California, US; and São Paulo, Brazil.

We are currently expanding our Sofia Delivery Center and looking for **Analysts** to join our growing team. The role will be mainly responsible to Support the Project Delivery carrying out elements of software configuration, and testing to develop Decision Analytics solutions. Experian's Decision Analytics division specializes in providing credit risk and fraud management consulting services and products to enable organizations to make fast, accurate and profitable decisions.

Responsibilities:

- Software configuration, test and support - configure and test Experian Decision Analytics software according to specifications
- Identify potential problems in the delivery and take ownership for the resolution
- Follow software delivery lifecycle process including creation and maintenance of project documentation
- Information gathering - work with customers to understand requirements and take part in client workshops
- Data analysis - extract, formulate and manipulate data to create structured samples necessary to address business requirements

The successful candidate will have:

- University degree or equivalent standard with a high-numeric/IT/business content
- Basic experience in software solution configuration
- Basic experience in general purpose IT packages
- Understanding of the solution delivery lifecycle
- Strong problem solving and analytical skills
- Personal organization skills and teamwork
- Good communication skills and ability to work in multi-cultural team
- Fluency in spoken and written English
- Flexibility to travel in line with business needs

The following skills and abilities will be considered as an advantage:

- Knowledge and/or experience with XML; SQL; web services; Java; JIRA, SoapUI

We offer:

- A competitive remuneration package with social benefits.
- 25 days paid vacation and work-life balance.
- Training and professional development.
- Work in varied, fast-paced environment using modern practices and technologies.
- Opportunity to stay current with technologies and advancements in the field.
- A friendly and non-conflict working environment.
- Skilled co-workers to share experience with.
- Fun and quality recreation time.
