

## Summer Research Internships at ETH Zurich

The Software Reliability Lab (SRL) (<http://www.srl.inf.ethz.ch/>) at the department of computer science, ETH Zurich (<http://www.inf.ethz.ch/>), Switzerland has an opening for a summer research internship for an outstanding Bachelor or a Master's student. The department of computer science (D-INFK) is one of the top ranked departments in the world and offers a lively and exciting research atmosphere.

The SRL lab works on various inter-disciplinary projects including advanced programming tools combining program analysis and statistical models, program synthesis, concurrency analysis and algorithms.

The research internship is designed for outstanding students who are interested in tackling challenging research problems. Preference is given to student potential rather than a particular area of specialization. The 3-month internship is fully paid and covers all costs such as daily expenses, apartment rent, flight tickets, etc.

Students who are interested in the above or closely related topics, and who would like to pursue a summer internship with the group should apply by sending a CV to Prof. Dr. Martin Vechev: [martin.vechev@inf.ethz.ch](mailto:martin.vechev@inf.ethz.ch)
