Job Description

Responsible for successful delivery of Extended Warehouse Management (EWM) module implementations in client engagements, ranging from implementations and upgrades to extensions of existing applications.

Assist clients in selection, implementation and support of SAP solutions, including design, configuration, and testing. Provide functional and business process expertise on a project team, consisting of consultants, remote global resources and client employees. Participate in design activities and a gap analysis prior to the implementation.

Requirements

- University degree in informatics, engineering or mathematics
- Very good technical understanding
- Fluent English, both oral and written
- Good team player with communication skills
- Willingness to travel

Nice to have

- Experience in SAP
- Programming skills in ABAP or any other language
- German
