

Axway is the ONLY provider in the market today to manage, run, secure, and monitor all your business interactions – emails, files, messages, services, events, and processes. Spanning all industries, over 11,000 organizations in more than 100 countries depend on Axway's proven breadth of services and Layers of governance to build and improve value chain efficiency, regulatory compliance and quality of service.

AXWAY is looking to expand the Support team in our Sofia Office

NodeJS Developer

Your Role:

You know that NodeJS is the future of the web and you are not afraid to join the Dark Side of JavaScript. You are always up-to-date with the latest goodies in ECMA Script and looking forward to use them ASAP. You are OK with forgetting all you know or don't know about Object Oriented Programming and you feel comfortable in Prototypal inheritance, first-class functions and event loops. We have the NodeJS project of your life. Meet Arrow – the Swiss army knife in MBaaS. Following Axway and Appcelerator merger earlier this year, we are looking forward to grow Arrow and use it in our internal projects. As a NodeJS developer you will play a key part in using and contributing to Arrow. Still reading this? Good we got your attention, please keep reading further or just send us your resume!

In order to be successful in this role it's good to have:

- A few years of professional experience in NodeJS and document oriented databases like MongoDB
- Experience in developing API driven web applications and using JavaScript, CSS, HTML5
- Familiar with agile software development methodologies
- Experience with TCP/IP networking and technology
- Familiar with HTTP/SMTP/FTP/SSH
- Familiar with relational databases like MySQL OracleDB and PostgreSQL
- Experience in application communication protocols such as REST, Oauth, SOAP, SAML
- Knowledge in application and web security
- Experience in Linux/UNIX operating systems and container systems like Docker
- English Language – Excellent English verbal skills
- Excellent teamwork skills, must be assertive and approachable

The following additional skills will be an advantage:

- Have used Arrow and/or Titanium
- UNIX Shell scripting
- Knowledge and experience in developing Java applications

- Knowledge and experience in developing PHP web applications
- Knowledge in PL/SQL and Oracle databases
- Knowledge and experience in search engine technologies – ElasticSearch, Lucene, Google SearchAPI
- International exposure is a plus
- Ability to work independently with little direct supervision is essential
- Ability to absorb and articulate new technology in a way that customers can understand

Why AXWAY:
