

## **PYTHON Developer**

Gameloft is an International leading publisher and developer of downloadable video games for mobile phones and consoles, presented in 20 countries in all over the world. Our hit games and franchises include *N.O.V.A.*, *Modern Combat*, *The Amazing Spider-Man*, *Ice Age Village*, *Zombiewood*, *Oregon Trail: American Settlers*, *Order & Chaos*, *Dungeon Hunter*, *Gangstar*, *9mm*, *Zombie Infection*, *Let's Golf!*, *Real Soccer*, *Assassin's Creed*, and *Brothers In Arms*.

We are looking for PYTHON Developers to join our team

### **Overall responsibility**

The Python Programmers will work closely with the game play programmers and the server team to analyze and run the implementation of server related game features.

### **Core Responsibilities**

- Support and maintain the game servers and network communication via TCP/IP
- Work closely with the design teams to define and program/develop the network portion of our games currently in development Solve real time problems at a large scale.
- Create and deploy the server architecture
- Support the gameplay developers and other developers in coding the game applications on the server side
- Suggest the best techniques to offer players the best network experience (optimize client/server exchanges and reduce latency)

### **Requirements**

- Experienced in Python
- Experienced in TCP and UDP networking and creating highly reliable and high performance server applications
- Experience with C++ is a PLUS
- Experienced with MySQL or noSQL solutions, both database design and optimizations;

### **Why join us**

- Be part of the team powering up Triple-A titles for Android and Apple devices;
- Challenge and improve your programming skills on a platform that meets the demands of millions of users every day;
- Design and develop new features to enhance new and cutting edge projects;
- Work with large scale databases (billions of daily new entries);
- Work in a multinational team with experienced developers.

### **We offer:**

- One of the best salaries on the market, a merit based pay system and bonuses
- Medical insurance package and meal vouchers
- A collaborative and creative environment, a supportive working climate and a free communication style allowing you to increase your knowledge by sharing ideas and solutions.
- An opportunity to work, learn and evolve in a professional environment, on top quality games including worldwide known licenses.
