

Reporting Analyst

Duties & Responsibilities:

The Reporting Analyst will be engaged primarily in client project work in our Business Analytics Tech Team, and secondarily in supporting other members of the Business Analytics team with any needs relative to database and reporting technologies. The job responsibilities include:

Data Manipulation & Analysis: Reporting Analyst will be responsible for assisting in the development and support of database reporting environments that facilitate the manipulation, analysis and reporting of client and market data.

Database/Reporting Technologies: Reporting Analyst will be responsible for assisting Technical Lead with the configuration, maintenance, administration and testing of programs using the following technologies:

- Microsoft Office SharePoint Server 2007/2010
- Microsoft SQL Server Reporting Services
- Microsoft SQL Server Analysis Services
- Microsoft VB.Net/C# applications

Required experience:

- Experience with SQL (queries and any advanced functions, such as joins etc.) and/or other relational databases
- Experience using OLAP technologies to create multidimensional reporting structures is preferred but not required
- Familiarity with SharePoint/.NET programming is preferred, but not required

Required Skills:

- SQL, T-SQL
- Excellent communication skills, including both written and verbal
- Pro-active, independent thinker with high energy/positive attitude
- Ability to interact effectively with peers in a team-oriented operating structure
- Microsoft Office SharePoint Server 2010, 2007
- Microsoft SQL Server 2008 BI Suite (SSRS, SSAS, SSIS)

Education:

BE or BS Degree in one of the following subject areas: Computer Science, Information Technology or related field preferred.
