

Senior PHP Developer

If you think you can write this piece of code better than we did:

```
< ?php

function check_candidate(Candidate $candidate, &$bonus_points) {

    $requirements = ["PHP5", "MySQL", "Secure code", "Web servers", "HTML", "CSS", "JavaScript",
"Teamwork"];
    $minimum_experience = 36;
    $advantages = ["Zend Framework", "DOJO", "jQuery", "Web services", "Linux", "Optimization",
"Scalability", "Quake III"];

    $pass = true;
    foreach ($requirements as $requirement) {
        if ($candidate->complyWith($requirement) == false) {
            $pass = false;
        }
    }

    if ($candidate->getExperienceInMonths() < $minimum_experience) {
        $pass = false;
    }

    foreach ($advantages as $advantage) {
        if ($candidate->has($advantage)) {
            $bonus_points += 1;
        }
    }
    return $pass;
}

?>
```

Send your **CV** to venelina.mazneva@trading212.com.
