Looking for a *Senior Web Developer*

Join the Players is all about **bringing amateur sports experience closer to the professional game**. We are creating *unique* products that *disrupt* the amateur sport industry, offering *HD video recordings, highlights, profiles, and statistics*. We value *innovation, world-class quality, and simplicity.*

We are looking for someone to **drive the development** of a *new consumer internet product* from its very *first steps* with customers to *scaling* a *working* solution. This might include *building* a small tech *team* around that person.

Required:

- Strong **software design skills**, know-how in *OOP design patterns* and common implementation;
- Deeper understanding of **full WEB stack protocols** (http, TCP/IP);
- Desire to work in a very **dynamic startup environment** and ability to **get things done**;
- **Solid experience** (at least 3 years) and **deeper understanding** of at least **one of the following** web dynamic languages: **PHP** (Zend Framework, Symfony 2), **Ruby** (Rails), **Python** (Django), **Groovy** (Grails);
- Understanding of **front-end JavaScript** technology stacks and libraries - jQuery, Twitter Bootstrap, jQuery Plugins, HTML, CSS, and DOM scripting;
- Competence in **modern software development** practices.

Additional:

- Experience in **TDD and Unit Testing**;
- **Source Version Control systems** - GIT, Subversion;
- Competence in **Unix Systems** and working slightly with Linux
- Experience working in **agile projects**;
- Constructive **critical thinking** and **problem solving** ability.

Personal development achievements like contributions to open source projects, competition awards or completed personal projects are a big advantage.

What you get:

- **Freedom** to define your best working style and environment in an **outcome driven** way;
- **Opportunity** to shape and develop a **new consumer product** in an **innovative startup** environment;
- Co-founder level **equity** at the company.

*If this sounds like the **right place and position** for you, we'd love to **hear from you**.*
