**PART-TIME SOFTWARE DEVELOPER**

**An Opportunity to Join A Leading Education Start Up**

We are an education start up based in Reading, UK founded by a former Director of Pearson, the world's largest education company and Oxford University Press making wonderful products that have been created to transform education, the way we learn and the way we engage with fellow learners.

**The Opportunity**

Tutorbox is currently recruiting talented graduates/undergraduates to join its project team to design and build an exciting new application. You must be passionate about building applications that have a social purpose.

Successful applicants will be confident of using the latest tools and methodologies to develop high-quality products. You must enjoy finding creative and optimal solutions for challenging problems. Attention to detail and initiative are key requirements. Ultimately, you must also share our passion for creating the very best in educational technology solutions

**Responsibilities**

- Design and build advanced applications as part of an international project development team

- Collaborate with cross-functional teams to define, design, and ship new features

- Work with outside data sources and API's

- Unit-test code for robustness, including edge cases, usability, and general reliability

- Work on bug fixing and improving application performance

- Continuously discover, evaluate, and implement new technologies to maximize development efficiency

**Skills**

Some or all of the following skills would be wonderful but we are also interested in new talent that believe they have what it takes but have not yet had the exposure required to prove themselves.

- BSc. or MSc. in Computer Science degree or equivalent (or working towards)

- Experience as a software engineer

- Android development experience

- Published examples of mobile applications

- Experience working with remote data via REST and JSON

- Good understanding of OO design, algorithms, design patterns and programming skills in Java

- Experience with third-party libraries and APIs

- Knowledge of modern version control systems (ideally Git using Gitflow)

- Ability to estimate tasks and plan projects

- Ideally a good command of the English language

This will initially be a part-time project opportunity on a remote/flexi-time basis (so you can be part of the team from wherever you are located internationally); and would be an ideal opportunity for a current undergraduate/postgraduate to obtain some very relevant practical experience for their CV on a paid basis with a very dynamic and well known leadership team.

**Make an application**

Please email Kalina Todorova on info@tutorbox.org.uk in the first instance with a copy of your CV and a short covering letter explaining why we should consider you for the role.

The first round application deadline is **31st January 2016**.
