

---

**Position:** Web Developer

**Goal:** To provide essential technical solutions that contribute to the success of the company's SEO and Content Marketing projects.

**Summary:** We are looking for someone who is self motivated, interested in growing as a front-end and back-end developer, and gets things done. You will work closely with other developer and non-developer team members in a collaborative and energetic start-up environment.

***Responsibilities:***

- Carrying out implementation of SEO Audit technical recommendations
- Collaborating with team members and taking the initiative in solving technical issues
- Translating design requirements into developer friendly code, frameworks, and APIs
- Development and customization of Wordpress blog themes and plugins
- Continuous development of the company website & digital assets

***Functional competencies:***

- Proficiency with PHP, MySQL, HTML, CSS, & Javascript
- Experience building dynamic web pages and fully-functional forms from the ground up
- Experience building modules for CMS such as Wordpress and Drupal
- Knowledge of Search Engine Optimization & Analytics a big plus

***Soft skills:***

- Curious, analytical thinking
- Constantly self-educating and staying up-to-date with new trends
- Structure, organisation, effective communication
- Enthusiasm, passion, energy

***How to apply:***
