

## Software Engineer (PHP, Linux)

Webinfluence Studio Ltd is a division of Webinfluence Group - an international company with offices in Estonia, Mexico and Turkey. The company employs people from a vast array of cultural and professional background and is active in over 62 countries worldwide. For the past several years, Webinfluence Group has been growing rapidly and its advertising platform Adcash has become one of the leaders in the French and European online advertising industries. Besides the advertising platform, the company has also developed many innovative projects in the field of Facebook applications and online gaming.

We are looking for enthusiastic and very talented person to join our brand new office in Sofia to build and maintain high-performance, scalable systems.

### Software Engineer:

#### Your role:

- You will be involved in the proper functioning of our advertising platform and the introduction of new features.
- You will also work on the entertainment projects from our portfolio – Facebook applications, Game portals and free SMS platforms.

#### Required skills:

- Excellent knowledge in PHP, MySQL.
- At least 3 years of professional experience with PHP.
- Good knowledge in English both spoken and written.
- Ability to work quickly and independently.
- High level of curiosity and eagerness to test new technologies.

#### Beneficial skills:

- Knowledge in C or Java.
- Experience with memcache, hbase, mongodb or redis.
- Passion for web development and innovative projects.
- Contributions to the open-source community.

#### Salary and benefits:

- Solve concrete problems by creating tools that will be immediately used.
- Opportunity to learn from the very best.
- Opportunity for self-improvement and growth.
- Push software to the limits (example: minimum 1'000'000'000 SQL queries per day).
- Great office with friendly atmosphere.
- Salary – 3 000 BGN NET.
