

JAVA DEVELOPER

SEEBURGER, company with 25 years experience in Business integration and a leading B2B solution provider, is looking for experienced and motivated Java developers to join to one of the biggest Development team - involved in data transmission and security.

Requirements:

- Java development experience and interests
- In-depth knowledge of the core J2SE APIs (threads, sockets, file IO, JDBC, JAXP)
- Experience with J2EE technology (EJBs, JMS, JMX)
- Basic knowledge of BPEL, WSDL, XSD specifications
- Experience with database design and SQL
- University Degree in Computer Science or similar
- Very good English
- Very good communication skills
- Self-motivated
- Good team player

The following will be considered as advantages:

- Experience with different J2EE application servers
- Database administration skills (Oracle, MS SQL Server and/or SAP DB)
- Experience with UML and the Rational Unified Process
- German language skills

We offer:

- Excellent remuneration package, based on personal achievement
- Challenging projects, personal development and excellent career possibilities in a multinational company working with leading-edge technologies
- Management open to ideas and suggestions for improvement
- Friendly and dynamic work-environment in a team of highly motivated young people
- Flexible working hours
