Job Description -   **IT Architect** - **as a member of our team or as freelancer**

Antwerp, Belgium – iButler - January, 2012

Position Scope:

You will get to work with leading edge technologies and strive to deliver results which cover multiple features. You will have the chance to prove yourself in this job and work together within our young & international team (English speaking) to accomplish the development and ongoing maintenance of new products and related services for our customers: local shops & couriers!

Job Responsibilities:

Design, develop and test major new features and enhancements
Problem solving to debug critical application functionality
Work closely with experienced team members & partner Universities to meet common goals
Maximize productivity and efficiency to meet challenging deadlines
Think ahead of (y)our competitors but listen even better to (the problems of) (y)our customers !

Experience and Skills Required:

Degree in Computer Science or Engineering
Minimum 2 years of software/web development experience with knowledge of C#/.Net Framework 4.0 and Visual Studio
Asp .NET: Webforms (aspx) en MVC
ADO.net en Entity Framework
WCF

 Specific experience with Windows Azure and/or SQL Azure is a plus (Message Queue's, Load Balancing, Access Control Service, WCF Security)
Preferably experience in software development for mobile devices (Windows Mobile 6.5)

Strong problem solving and critical thinking ability with structured and (object-) oriented solutions
Ability to work well under pressure, meet strict deadlines and communicate

Application Instructions

If you would like to receive more information please contact us or if you would like to apply immediately, please submit your resume to Tjerk@iButler.be citing IT Architect in the subject of your message. Please also elaborate on your experience working on relevant projects. We thank all applicants in advance for their interest in iButler!
