

## **Job Description - .NET Web & Mobile Developer**

Antwerp, Belgium – iButler - January, 2012

### **Position Scope:**

You will get to work with leading edge technologies and strive to deliver results which cover multiple features. You will have the chance to prove yourself in this job and work together within our young & international team (English speaking) to accomplish the development and ongoing maintenance of new products and related services for our customers: local shops & couriers!

### **Job Responsibilities:**

Design, develop and test major new features and enhancements  
Problem solving to debug critical application functionality  
Work closely with experienced team members and partner Universities to meet common goals  
Maximize productivity and efficiency to meet challenging deadlines  
Think ahead of (y)our competitors but listen even better to (the problems of) (y)our customers !

### **Experience and Skills Required:**

Degree in Computer Science/Engineering  
Preferably 2 years of software/web development experience with knowledge of C#/.net  
SQL skills and working knowledge of MS SQL Server  
Knowledge of HTML5, CSS, JavaScript, JQuery  
Good Knowledge of .NET, C#, Silverlight  
Knowledge of XML, SOAP and Web Services

Strong problem solving and critical thinking ability with structured and (object-) oriented solutions  
Ability to work well under pressure, meet strict deadlines and communicate  
Preferably experience in software development for mobile devices

### **Application Instructions**

If you would like to receive more information please contact us or if you would like to apply immediately, please submit your resume to [Tjerk@iButler.be](mailto:Tjerk@iButler.be) citing .NET Developer in the subject of your message. Please also elaborate on your experience working on relevant projects. We thank all applicants in advance for their interest in iButler!
