WE (a.k.a. WebEndians) are looking for a new team member.

WHO WE ARE?

We are an ambitious new start-up, which develops proprietary auctioning systems. We have the ambition of becoming a global player in a niche market segment. Even more importantly, we want to have fun, to grow our skills, minds and spirits and "make a dent in the universe"! We want to live life to the fullest and make the best out of our lives! :)

Currently we are looking for an experienced programmer to join our small, creative and friendly team. We are looking for positive, proactive, entrepreneurial person, who is open to learn and share, to achieve results, to create and HAVE FUN! :)

WHAT WILL YOU BE PART OF?

- You will be part of a software development team working on project base
- You will define/analyze the product requirements, write/read functional and design specifications, write/support the code
- You will perform code reviews to the rest of the team members and will receive code reviews of your code as well
- You will play key role during the whole development cycle – idea, requirements, specifications, designs, implementation, bug fixing, QA, support, etc.

WHAT WE LOOK FOR?

Someone who is, or desires to become:

- Open-minded, creative, friendly and SMILING :) person
- Experience with product development or strong willingness to switch from outsourcing to product development
- General programming knowledge – data structures, algorithms, design patterns, memory management, etc.
- Someone willing to innovate, learn and share knowledge, invent new algorithms and technologies
- Experience with Zend Framework and PHP
- Experience with design and implementation of complex user interfaces – custom controls, live updates, in-place editing, virtual data abstractions, MVC, performance optimizations for millions of objects, etc.
- Experience with enterprise architectures – remote method invocations, extensive XML usage, stateless designs, load balancing, SSL security, etc.
- Experience with multi-tiered architectures (Service-Application-Presentation)
- Excellent analytical and problem solving skills
- Excellent communication skills and fluent English (speaking/reading/writing)

WHAT WE OFFER?

- Challenging, exciting and fun work :)
- Opportunity to develop and create
- Freedom of thoughts and actions
- The thrill of being part of a global project
- Friendly, inspirational and supportive working environment

If you feel **challenged**, please get in touch with us or send us your CV at office@webendians.com
