

Perl Software Developer

Ref. No: PSD 02/12

Company

All Data Processing Ltd. is a worldwide provider of data processing, business content and media research services with over 15 years of experience. The company employs more than 250 people working in 30+ languages, 24/7, located in our offices in Sofia, Veliko Tarnovo and Kuala Lumpur. The success of our company depends on the qualifications and the commitment of our staff that ensures all projects are completed on time and in line with client requirements.

Job Description

As part of the expansion of our company's product offers, we are looking for a software developer experienced in Perl to join our IT team. You will work on developing and enhancing various types of applications, including: internal ERP and data management software to support the company's core activities, various custom intranet tools, etc.

Your work will involve extensive use of modern MVC frameworks, both in Perl and in PHP. You will have the opportunity to work on large data-intensive applications where scalability and high availability are paramount. You will work in an agile environment, where you will produce tangible results for the company.

Requirements and Qualifications

Required technical skills:

- Perl: Object-oriented programming, modern development practices, key API's.
- PostgreSQL and/or MySQL: We are a data processing company, and a lot of your tasks will include working with data stored in various databases, so SQL skills are a must.
- basic HTML/CSS skills
- Experience with UNIX-like OS

Desirable but not mandatory technical skills:

- Object-oriented programming with Moose
- Experience with ORM (DBIx::Class)
- Catalyst Framework
- PHP
- Experience with scalable and high-performance web architectures
- Git

Soft skills:

- Fast learner: You will often be working with new technologies, and many of them with a steep learning curve. It is important that you are enthusiastic about expanding your skills and ready to learn fast.
- Proactive: As part of a small team you will be in a position where your opinions, ideas, and feedback can make a significant difference, and you will be expected to be proactive about identifying

problems with the development process and proposing improvements.

- **Communication skills:** Your work will occasionally require communication with the company's non-IT staff in resolving issues, requirements gathering, etc. You should be a person who is able to communicate technical concepts to non-technical people and is patient and smart about understanding end-user requirements.

How to Apply

Please send a detailed CV to jobs@aiidatapro.com. Contact person George Dakashev.

We would like to know what projects you have worked on, what your responsibilities were, what tools you have used. Be sure to mention any achievements you have made, be they personal, professional or academic, even if not IT-related. If necessary to support the information in your CV, write a short cover letter.

Shortlisted candidates will be invited for an interview. If possible, at or before the interview, we would like to see samples of code you have developed. The interview will also contain a short technical test.
