

Node.js Engineer

Location Sofia

Apply by 2020-05-01

It is highly probable that at some point in time your data has passed through technology from DigitalRoute. If you turn on the heating in your house, travel by airplane, buy a train ticket or make a call with your phone from anywhere in the world! There is a great chance that the company behind these services use our technology to work with their data. You may not know about us, but the companies you trust to provide these daily services certainly do.

We are looking for talented Node.js Engineer that want to participate in building on the success story of DigitalRoute.

As part of our development team you will have the opportunity to work on some of today's most exciting problems in big data and real-time data processing. We promote self-organizing cross-functional teams, a flat hierarchy and flexible working hours to give all our employees a good work/life balance. Because of our large customer base, each with a different set of requirements, there is always a new challenge and you will most certainly find projects that align with your passions as a developer.

We think that you:

- Love programming but also love to question why, how and for who you build things
- Are solid team player that thrives in a global context
- Want to continuously improve the skill set of yourself as well as of your team
- Can create efficient, scalable and robust software using languages and tools like TypeScript, NodeJS, Kafka, MongoDB etc
- Feel excited about building globally scaling cloud services utilising things like AWS and Infrastructure as Code
- Understand CI/CD and containerisation tools like Docker, Kubernetes, Git, Jenkins, Jira
- Possess good written and verbal communication skills in English

As a Node.js Engineer at DigitalRoute you will:

- Develop a new cloud platform, which will be delivered as-a-service.
- Work in an international company with a global market.
- Implement new features and functions.
- Participate in the full product development cycle, from idea generation to getting feedback from end customers

Are you our new colleague?

Apply now,

We look forward to you joining us!

Any questions?

DigitalRoute

DigitalRoute helps hundreds of enterprises across a variety of industries worldwide to capitalize on the growing wave of consumption based commerce with our Usage Data Platform. DigitalRoute has been the market leader in this space, historically called billing mediation, for nearly 20 years. Over 350 leading companies worldwide use DigitalRoute Usage Data Platform to provide accurate complex usage-based business models. Our customers trust our technology to operate in the critical area of monetization.

We are a global company of 300 employees. We are headquartered in Stockholm and have offices all around the globe, from Kuala Lumpur to Atlanta. We are Experts - passionate and always seeking to improve. We are Open- minded - disruptive and innovative. We are Committed - customer satisfaction is our goal.
