UNLOCKING THE VALUE OF TIME PATTERNS

TRENDALYZE

TRENDALYZE is new big data company focusing on large time series data and on motif discovery. Trandalyze wants to be the Google for time series patter discovery and search. We want to unlock the value of the time patterns of the world. The key people of the company are located in London, New York and Sofia with R+D in the latter. We are using software/platforms like Java,R,Spark,Drill, etc. We are looking for young and bright people to participate in a study program together with FMI, Sofia University.

The program will have a duration of 3 months. At the end the best participants will get an intern or even employment offer for outstanding performance. Each project will be reviewed with diligence and the nature of the program will be competitive. There will be preliminary screening of the candidates - an interview.

We offer:

- Interesting big data use cases with the needed data.

- Possibility for internship or employment upon successful completion of the program

- You can use your choice of programming language - R or Java are preferable but Python or Scala or some JDBC client tool or even just SQL could do.

- We will cover some educational costs - MOOC and Certification sponsorship covering Spark and Hadoop technologies, SQL analytics and machine learning modules, access to papers/books etc.

- Additional monthly cash stipend will be discussed during the interview as well as awards for outstanding achievements in the program

- Help from the organizers throughout the duration of the program.

Interested?

If you are interested in this opportunity, please do not hesitate to apply, by sending us your CV to aleksandar@trendalyze.com no later than October 30. The selected candidates will be contacted within 1 weeks of the closing date for applications.
