

JUNIOR SOFTWARE ENGINEER APPLICATIONS DEVELOPMENT SPECIALIST

The development center of SAP in Bulgaria is technology-focused and plays key role in the defining and developing of the SAP Cloud Platform. With its more than 830 professionals, [SAP Labs Bulgaria](#) also has strong contributions towards life-cycle management, user interface & user experience across the broader portfolio of SAP products. For its 19-years history, the company has established itself as a preferred employer in the IT sector in Bulgaria.

PURPOSE AND OBJECTIVES

The SAP Environment, Health & Safety Management (SAP EHS) and Product Compliance solution capabilities support customers' sustainability initiatives.

As an integral part of SAP S/4HANA these applications enable companies to be compliant with worldwide environmental, health and safety regulations.

The team in Sofia is a strong contributor to the overall business solutions development.

We value personal motivation for excellence and technical skills as much as teamwork, trust, collaboration, and creativity.

We are looking for a Junior Software Engineer who

- possesses creative mindset
- is enthusiastic to gain knowledge in business solutions development
- is ready to learn from his/her mentor
- is inspired by cloud technologies

EXPECTATIONS AND TASKS

- You will be working in a cross-functional team of talented and motivated colleagues, following Agile methodologies and the industry's best practices
- Support the team with software development tasks, focusing on quality.
- Learn and work with SAP development tools and technologies, like Fiori and SAP UI5 frameworks, ABAP programming language, Core Data Services (CDS), in-memory computing, SAP Cloud Platform, and others.

EDUCATION AND QUALIFICATIONS / SKILLS AND COMPETENCIES

- University education in Computer Science or software academy trainings
- Good understanding for object-oriented programming and experience in data structures and algorithms
- Experience in RDBMS and SQL
- Experience in web technologies like JavaScript, HTML/CSS will be considered an advantage
- Knowledge in ABAP programming language will be considered a strong advantage.
- Excellent soft skills and good command in English
