KOSTAL

C Embedded Software Developers / Test Engineers

Kostal has an exciting opportunity for **Embedded Software Developers / Test Engineers** to join its Automotive Software R&D Centre in Sofia.

The roles are ideal for anyone looking to work with cutting edge technology in a team of top-notch Engineers and will provide you with the opportunity to immerse into the great world of Automotive Electronics and C Embedded Programming / Validation.

What You Need For The Positions:

University degree in Computer Engineering, Software Engineering, Electronics or related education
Experience in embedded development
Good experience in C programming language
Basic knowledge of HW
Passion for C Embedded programming / Software Validtion and a desire to carve out / continue your career in the field
Knowledge of English language on a working level (both verbal and written)
Strong analytical skills and ability to work in a team environment
Strong orientation towards quality and continuous improvement

What's In It for You:

The work is absolutely at the forefront of automotive technology and the facilities and the environment are fantastic;
The development team is extremely capable and enthusiastic and the work demanding but fun;
In addition we offer regular holidays and more vacation time and social activities, including company football team, team buildings, internal and external trainings, etc.;
The role comes with a very competitive remuneration package which will meet the experience and expectations of the candidate and responsibilities of the role.

KOSTAL Group develops and manufactures technologically advanced electronic, electromechanical and mechatronic products. The Group has 46 locations world-wide in 21 countries on four continents, with a work-force of about 18 000 people, ensuring competent and flexible service on a local basis.
The KOSTAL automotive electrical systems division product range extends from steering column switches to complete, integrated modules which we are very proud to have been delivering for over 50 years now. Visit our website for more information about the company: www.kostal.com

So, if you have strong interest in the automotive industry and your future is Embedded Software, please send us your CV in English for immediate consideration at mihail.gagov@hmglinks.com
Feel free to share the great news with your friends as we will be happy to welcome them aboard and help them further develop their embedded skills.

KOSTAL is committed to equal employment opportunity, diversity and inclusion in the workplace. We are looking for male and female profiles alike. Only short-listed candidates will be contacted.
