

## Junior Frontend Web Developer - HTML, CSS, JavaScript

We have some really exciting long-term projects coming in the next few months. We have an immediate need for a junior web developer who is eager to learn to build complex applications, experiences and layouts.

We're open (in fact we encourage it) to using new technologies and development methods as we don't have to support outdated browsers and platforms.

What you'll do:

- Learn modern web development techniques
- Develop complex layouts and apps
- Have fun at work and do what you do best

What you won't do:

- Work directly with annoying clients
- Work on old legacy projects
- Spend your whole day in boring meetings

Must Haves:

- At least 1 year of experience with HTML & CSS
- A solid portfolio showing off your latest and past work
- You learn fast and work in detail and independently

Bonus skills

- Object oriented programming using javascript
- Experience with a framework like Vue, React or Angular
- Using web animations, TweenMax, mo.js, anime.js etc...

We do:

- Company trips to Las Vegas and London every year
- Tailor-made personal career program for development
- Significant bonuses based on personal performance

...and

- Bonus paid leaves based on performance (20 + 5)
- Budget for the most popular conferences and meetups
- Modern office in the city center with an amazing view
- Awesome mix between all benefits of a large company and all advantages of a creative startup culture
- Optional indoor parking space
- Dope bar every Friday @ our place

About us:

We sponsor the technologies we use like Vue.js

We're a product orientated company and we do everything inhouse right here in Sofia

We created Boost - a training program carefully designed for junior developers
