

Junior Software Engineer with Java

Who we are:

Ontotext helps companies upgrade their data into knowledge! Through the years we have received several awards as the most innovative business in Bulgaria. We enjoy a unique position providing state of the art semantic technology in two distinct but complementary areas – graph database engines and text analytics. Our solutions have been applied in the areas of publishing (BBC, Financial Times, Oxford University Press), life sciences (AstraZeneca, Johns Hopkins University), cultural heritage (British Museum, Getty Trust, Carnegie Hall), Industry (Fujitsu, NASA, Korea Telecom), government organizations (UK Parliament, The Netherlands Kadaster) and many others.

Who are we looking for:

We are looking for **Junior Software Engineers with Java** who want to grow their knowledge together with us!

The Role:

As **Junior Java Developer** you will work with a team of talented software engineers on the products and the solutions we build for our customers. We will do our best to speed up your professional skills development, on-the-job, by assigning appropriate tasks, such as:

- Developing new features and functionalities
- Extending, improving, and supporting existing components
- Working with senior developers to understand requirements and implement best practices
- Maintaining code quality, organization, and automation by covering with adequate tests
- Applying Scrum and Agile practices in your daily work.

The Profile:

To be successful at this position you should be / have:

- Student in 3rd year of studies (or higher), technical major
- Fundamental knowledge of the programming concepts (OOP, data structures, and algorithms)
- Experience with Java and willingness to expand your knowledge
- Open-minded, collaborative and proactive attitude
- Ability to learn new skills quickly
- Very good command of English

We offer:

- Opportunity to work with most technically gifted people in our industry and to learn and exchange ideas with experienced Software Engineers and Java Gurus
- Chance to participate and learn best practices related to the Agile software development
- Clear career path and defined personal goals with achievement-based career prospects
- Remote work, flexible working hours and great work-life balance
- Tailored onboarding process
- Dynamic environment, flat hierarchy and common-sense culture, where everyone's voice is heard;
- Exposure to new technologies, international companies, projects and teams.
