About us:

Dreamix Group is a holding of software companies providing services, products and innovations in the ICT sector.

Dreamix Ltd provides software development and consulting services with Oracle and Java EE technologies.

Our mission is to inspire innovations and be a place where the dreams come true.

Job description:

We need a highly motivated person eager to learn new technologies and platforms in various J2EE projects. In this position you are responsible for the design and development of Java EE applications for our clients, which are mostly foreign companies.

Minimum qualifications:

- Student/Degree in computer science or similar technical field;
- Excellency in English, written and spoken;
- Object-oriented design skills;
- Good understanding of data structures, algorithms and complexity analysis.

Preferred qualifications:

- Strong awareness of Java EE (including JavaServer Faces, Struts and other web frameworks);
- Expertise in JDBC, Hibernate and/or JPA;
- Experience with Agile software development methodologies (SCRUM, Extreme programming, Velocity tracking, etc.).

If you:

• enjoy working in a friendly and motivating atmosphere;

• welcome an unmatched opportunity for learning, self-development and professional growth;

• would like to receive competitive remuneration package, based on your personal results

...then don't hesitate to join our team!

If you are interested in our vacant position please send your CV to jobs@dreamix.eu.

Only short-listed candidates will be invited for an interview.
