

Junior QA

We are looking for a manual Junior QA to take a vacant spot in our QA team based in Sofia, Bulgaria.

To be considered for the job, you'll need to meet the following requirements:

- In-depth understanding of software testing processes;
- Analytical and problem-solving skills that will amaze us;
- Experience with bug tracking and version control systems;
- Very good command of English and iron-strong communication skills

But wait, there's more! These are the bonus points skills:

- A degree in computer science or information technology;
- Knowledge of Linux/Unix operating system;
- Knowledge and experience with Databases and SQL;
- Experience with TestNG, Selenium (web driver) or other similar frameworks;
- Experience with performance and stress testing;
- Experience with testing mobile applications

Now let us tell you what you'll do:

- Analyze new and existing software components and requirements;
- Develop, publish and implement test plans for complex, multi-tier applications (web, iPhone, iPad, Android) throughout the entire life cycle of the software;
- Analyze test results to identify areas of concern and spot weaknesses;
- Work closely with developers following an agile development methodology;
- Running and maintaining automated web tests (but only if you want to)

Obviously, we require a lot but we also give a lot back:

- Freedom, space, and a lot of opportunities to grow and develop your talent and skills;
- An amazing team culture;
- A competitive salary;
- Great health benefits package;
- Memorable team buildings and company events;
- Work hard, play hard – we've recently moved to a new state-of-the-art design office;
- A massage room;
- Every Friday – tasty food treat;
- Time to recharge - 22 days of paid time off;

If all this sounds like your cup of tea, then go ahead and email us your **CV** to hr@trading212.com!
