

## Junior Quality Assurance Engineer

We build next generation IT solutions for impactful organizations. We engage creativity and innovation to deliver quality and value. We believe in mutual respect, inspired teamwork and continuous development.

Our QA practice is growing and we are looking for a motivated Junior QA Engineer to join us!

Being part of our team of 70+ QA professionals, you will have the opportunity to work with well-established professionals and develop further into your career.

### REQUIREMENTS:

- Passionate about quality and striving to its improvement in every detail
- Interested in software testing techniques and approaches
- Enjoying writing code and have good command in Java language
- Have good understanding of OOP principles, relational databases, algorithms
- Have good command of English (spoken and written)
- Eager to acquire new skills and to gear your fast-learning abilities

### RESPONSIBILITIES:

- Design and execute functional test cases and scenarios
- Create and maintain test automation scripts with Selenium WebDriver
- Execute test scripts and maintain the results
- Troubleshoot found problems, investigate root causes and provide comprehensive test reports and analysis of the test results
- Monitor and improve the testing process for achieving superior quality of the solutions (test driven development, design and code reviews, etc.)

### WHAT WE OFFER:

- Attractive compensation package – competitive salary, additional health insurance plus “big family” bonus, vacation plan including additional “loyalty” days off, company sponsored mobile phone plan, MUSE – shopping discounts program, free snacks and beverages at the office.

- Rich opportunities for career development – different career paths – vertical and horizontal, individual career development plans, regular performance feedback and assessment, knowledge sharing culture and numerous educational events, technical and soft skills trainings.
- Comfortable work environment – office space following latest agile trends, cozy and creative atmosphere, comfortable desks & chairs and state of the art hardware, open communication, team events, company and family celebration
