

PHP Developer

We are seeking a full-time PHP developer with Drupal experience to join our development team in Sofia. This individual will work with the StoreGecko team on new e-commerce projects, from initial business development and discovery phases through implementation and deployment of the completed projects.

Responsibilities

- ✿ Work with the StoreGecko team on new e-commerce projects, from initial business development and discovery phases through implementation and deployment of the completed project
- ✿ Install and configure Drupal e-commerce platform for new projects
- ✿ Create custom e-commerce modules or other new functionality using object-oriented PHP and the Magento or Drupal APIs
- ✿ Configure and maintain Linux-based web servers optimized for the e-commerce platform
- ✿ Work with StoreGecko designers to implement custom skins and templates for the front-end
- ✿ Understand and effectively communicate e-commerce features and limitations with regard to design and development decisions on new projects
- ✿ Help manage development process, drive decisions and coordinate efforts with fellow Geckos

Requirements

- ✿ Significant PHP experience, including experience building object-oriented websites in PHP5
- ✿ Familiarity with the Model-View-Controller (MVC) architectural pattern, and previous experience developing web applications using this pattern or on existing MVC frameworks
- ✿ Solid experience interacting with MySQL database systems through abstraction layer (in addition to the ability to write raw SQL queries)
- ✿ Solid experience using PHP to create and consume web services (SOAP, XML_RPC) and/or other experience implementing data integrations within the platform
- ✿ Experience using Linux to maintain and configure Apache/MySQL web services. Additional Linux command line skills also a plus
- ✿ A keen interest in emerging technologies and how they might impact future design decisions and strategic directions
- ✿ Knowledge and experience of JavaScript development

Benefits

- ✿ Initial salary of 2000 – 2500 Bulgarian levs (after tax)

Reply with CV to ivelina@storegecko.com

StoreGecko is young Internet startup company. Its goal is to place the non-technical web shop owners on the same level as the big players in the Internet battlefield in terms of resources and technology.

Working of the accelerator program at Level39 in Canary Wharf, StoreGecko builds a new SaaS platform for PIM (product information management) for the small to medium sized e-commerce market.

StoreGecko will offer easier capture of raw product data from suppliers, it will provide intuitive tools for better enriching and cataloging the product data, opening up the new world of additional digital sales and promotion channels that are flooding the e-commerce market these days.
