

Junior PHP backend developers

Pytek is a fast growing IT company. We combine innovative thinking with industry knowledge to deliver business, digital and technology services.

The backend team is in need of junior developers that are ready to jump in the web development world and develop next generation software solutions.

If you have:

- Good/Basic knowledge of PHP (7.X), MySQL, PostgreSQL, Git
- Basic knowledge in OOP, MVC
- Knowledge of RESTful APIs, Linux(Debian, Ubuntu), Laravel or Symfony frameworks is a plus
- Bachelor's degree (preference given to Computer Science, Engineering, Informatics) or equivalent experience
- Good understanding of English

Personal skills:

- Ambitious
- Team player
- Communicative
- Loyal

We offer:

- A teammate always ready to help or share knowledge;
- Flexible working hours;
- Position, financial and knowledge growth based on your performance;
- Monthly feedback;
- The colleagues you always want to have.

If you like the idea to be a part of our backend team, then we're looking forward to receiving your CV by email: gergana.petrova@pytek.bg
