

As one of the region's largest telecommunications infrastructure services provider, CETIN Group drives digital transformation by providing cutting edge telecommunications infrastructure solutions.

The CETIN Group means four infrastructure operators - CETIN Bulgaria, CETIN Hungary, CETIN Serbia and CETIN in the Czech Republic with approximately 3000 employees. With the organization constantly working on improving and managing technology demand, its focus is to deploy the best in class telco infrastructure and meet challenging market demands.

CETIN Bulgaria is a provider of wholesale telecommunications services and was founded in 2020 after undergoing a legal separation from Telenor Bulgaria and acquiring local branch of Telenor Common Operation. The company owns and operates one of the largest telecommunication networks in Bulgaria.

Role Overview:

Navigate the information security monitoring systems and networks and actively participate in the full cycle of monitoring, identification, investigating, handling and resolving security incidents/breaches

Your main responsibilities would be to:

- Constantly monitor and analyze the information security systems and networks, handling security issues and incidents
- Investigate cyber security incidents and security breaches
- Assess and triage the findings, rate the risk and damage might be caused by those
- Take part in the security incident remediation by initiating and coordinating it, and supporting the response teams
- Coordinate and participate in secure evidence collection
- Liaise with other cyber threat analysis entities
- Actively and continuously promote and contribute to improvements of security processes, like the security monitoring, threat detection, and threat prevention
- Contribute to all areas of security as a team member and also collaborate across security domains in an international work environment

What we would expect from you:

- Relevant Bachelor's/Master's degree and/or equivalent work experience in information security, computer science or related field
- Experience in other fields of information technology (like software development, integration or operation and maintenance) is an advantage
- Professional Security Qualification is an advantage
- Strong ethics and confidentiality
- Analytical mindset
- Fluency in English (both written and oral)
- Ability to see the big picture, evaluate risks and support decisions
- Ability to quickly acquire and utilize knowledge on new methodologies and solutions

Our offer:

- Working opportunity in a collaborative team
- Positive workplace culture where you would receive all the support you need from your peers and managers in order to achieve your personal and team goals
- Annual bonus based on your personal performance

- Preferential prices for mobile devices and accessories
- Unlimited mobile services and mobile internet
- Flexible working hours
- Monthly food and gift vouchers
- Transportation allowance
- Additional health insurance
