

Synergy GFS Internship „Java EE Development “

Synergy Global Financial Solutions is a company focused on providing integrated solutions to banks and financial institutions. The company is a partner of Oracle Financial Services and Software.

This year the company will partner with Faculty of Mathematics and Informatics of Sofia University for an internship program with focus on **Java EE Development (Java EE, Spring, REST & SOAP web services)**. The internship program is with **1 month'** duration, from **1st of August to 31st of August**. The program requires onsite presence at our company facilities and does not include online version.

During the internship program, the interns will gain experience in the fintech industry. They will have the chance to work with an assigned experienced mentor with various technologies in the Java development spectrum (Java EE, Spring, REST & SOAP web services).

We're looking for:

- **3rd year or higher** students in the fields of Informatics and Software Engineering. Students with other IT majors are welcomed as well to apply;
- English proficiency;
- Strong interest in Java Development;

You'll benefit:

- Knowledge in back-end development technologies;
- Ongoing mentorship and support;
- Dedicated appliances;
- Opportunity for a permanent job;
- Receiving a Recommendation Letter describing the technologies used and the assignments performed as well as the capability of the student to cope with complicated tasks within a limited timeframe;
- Gaining experience in a recruiting process.

If you are interested in having your internship with Synergy, please send your CV with detailed description of your university/personal projects and short motivation letter on why you would like to be an intern at Synergy, to desislava.dimitrova@synergygfs.com not later than **22nd of July 2022**.

Note that we have **limited number of places available** and we will be contacting only selected number of students.
